

ARIHANT GOLCHHA

+91-9587728297 | Jodhpur, Rajasthan, India

golchhaarihant2005@outlook.com | linkedin.com/in/arihant-golchha | github.com/Arihant-golchha

Summary

Artificial Intelligence and Data Science undergraduate experienced in web applications, OCR solutions, and backend architecture through academic and technical projects. Proficient in C++, Python, JavaScript, SQL, React, Node.js, database handling, access control, and software development with emphasis on efficiency, analysis, system improvement, and practical execution.

Skills

Programming Languages: C++, Python, JavaScript, TypeScript, HTML5, CSS3, SQL

Frameworks and Libraries: React.js, Node.js, Express.js, FastAPI, Material-UI, OpenCV, Scikit-learn

Databases: MySQL, MongoDB

Tools and Platforms: Git, GitHub, Docker, Google Cloud Platform, Postman, Cloudinary

Core Areas: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, REST APIs, JWT, RBAC, CI/CD, API Testing

Projects

Binary29 E-Commerce Platform

Oct 2025 – Jan 2026

Node.js, React, MySQL, Razorpay, Postman

- Developed e-commerce platform featuring authentication, catalog organization, purchase flow, order handling, and Razorpay integration serving 500+ users.
- Refined checkout sequence and navigation structure, decreasing cart abandonment by 25% through usability improvements.
- Lowered response latency by 40% through server-side restructuring, endpoint refinement, and MySQL optimization.
- Designed 100+ Postman API validation cases for reliability checks, testing coverage, and deployment quality.
- Cut page load duration from 800ms to under 200ms through interface rendering and filtering enhancements.

EDUAI Exam Evaluation System

Jun 2025 – Sep 2025

Python, OpenCV, Google Cloud Platform, MySQL

- Created OCR-powered handwritten answer-sheet assessment system analyzing 500+ papers with 92% accuracy.
- Applied image preprocessing, text extraction, and grading pipelines for structured academic evaluation.
- Shortened manual grading time from 45 minutes to 9 minutes using automated workflows.
- Supported classroom-scale assessment through organized storage and evaluation management.

HealthMap Medical Record System

Feb 2025 – May 2025

Express.js, MongoDB, Cloudinary

- Built healthcare record platform using AES-256 encryption, JWT verification, and role-based access control.
- Established REST endpoints for patient information storage, retrieval, and access handling.
- Accelerated MongoDB retrieval to sub-50ms in testing through schema and indexing improvements.
- Incorporated Cloudinary for secure file organization and medical document management.

Education

M.B.M University, Jodhpur

2024 – Present

Bachelor of Engineering in Artificial Intelligence and Data Science

- Relevant Coursework: Data Structures and Algorithms, Machine Learning, Linear Algebra, Database Management Systems, Object-Oriented Programming, Software Engineering, Computer Networks

Achievements

- All India Rank 36 in National Entrepreneurship Competition among 10,000+ teams.
- LeetCode Rating: 1500+ with strong algorithmic problem-solving ability.
